**Supplies & Equipment**
Sterile Wraps & Bag(s)
ID label
Ice & Ice Bag
Validated shipping box/container labeled with Quarantine and “For Autologous Use Only” Labels

**Acceptance Criteria**
1.0 There are no patient-donor age limits for autologous tissue donation.

2.0 Donor suitability criteria is established and documented by the licensed physician caring for the patient-donor, not Community Tissue Services (CTS).

3.0 Tissue received by CTS must be properly labeled, correctly packaged, and be accompanied by a completed *Request for Storage/Processing of Autologous Tissue* form (CTS-600-F-02).

3.1 The hospital staff is responsible for verifying the expiration date for the autologous tissue kit prior to use. A label, as shown below, will be on the outside of the shipping box and on the outside of the bag that contains the supplies, documenting the expiration date of the autologous tissue kit.

![ATTENTION: VERIFY EXPIRATION OF THE AUTOLOGOUS KIT CONTENTS INSIDE PRIOR TO USE. EXP. DATE:_____](image)

3.2 The hospital staff is responsible for the proper handling, wrapping and labeling of the autologous tissue.

4.0 Identification of the donor is the responsibility of the hospital staff involved with the recovery of autologous donor tissue.

5.0 Obtaining informed consent for collection and storage of autologous tissue, along with maintaining the consent with the patient chart, is the responsibility of the hospital, not CTS.

6.0 Methods for perioperative autologous tissue collection and transplantation shall be safe, aseptic, and ensure accurate identification of the autologous tissue.

7.0 Hospitals must notify the tissue bank on all autologous donors at high risk for hepatitis or HIV.
8.0 Autologous donation should not be undertaken when the donor-patient has, or is being treated for bacteremia or other significant bacterial infection that can be associated with bacteremia, unless such cells and/or tissue will be secondarily sterilized prior to transplantation or treated in such a manner to minimize microbial infection.

9.0 CTS does not open any autograft even if irradiation is ordered. Irradiation will occur in the packaging sent by the hospital.

10.0 CTS has the right to refuse to store any tissue that does not meet the acceptance criteria.

**Directions**

1.0 **Post Recovery Packaging:**

Immediately following recovery of the autograft, the tissue shall be individually and aseptically wrapped in a manner to prevent contamination of the contents, preserve cellular structure and viability, if desired, and to allow for aseptic delivery of the tissue at the time of storage, irradiation, if necessary, and re-implantation.

1.1 **Bone (frozen storage):**

**Note: Do not wrap graft directly on absorbent material.**

1.1.1 Insert the graft into a sterile bag/container.
1.1.2 Wrap the bag/container in sterile wrap.
1.1.3 Wrap again in a second sterile wrap.
1.1.4 Insert the wrapped graft into another sterile bag or container and tie off/ close the container.
1.1.5 Hand off to the circulating nurse.

1.1.5.1 CTS suggest utilizing the read back method to assure correct patient and graft.

2.0 **Labeling:**

2.1 Complete CTS-600-F-01, Autologous Donor “For Autologous Use Only” label/tag.

2.2 Attach completed CTS-600-F-01 to the outside of packaging.

3.0 **Transport/Packaging:**

3.1 Fill the ice bag with a minimum of 10 pounds of wet ice. Place the wrapped tissue graft on top of the ice bag, in a validated shipping container, such as a box provided by CTS. Contact your local branch if you do not have an autologous kit on hand.

3.2 All transportation boxes being shipped to CTS must be labeled with the following:

- “For Autologous Use Only”
- “Quarantine”
- Hospital name and address
- CTS name and address
4.0 Complete CTS-600-F-02, Request for Storage/Processing of Autologous Tissue form.

4.1 Place completed form in a bag before putting it into the shipping box.

5.0 Seal the shipping box and contact CTS to arrange for delivery and retrieval of autologous donor tissue. Please be sure to contact the appropriate CTS Branch location.

5.1 **Community Tissue Services - Fresno, California**
6721 N. Willow Avenue
Suite #102
Fresno, CA 93710
1-800-684-7783 (Option 2)

5.2 **Community Tissue Services - Dayton, Ohio**
349 South Main Street
Dayton, OH 45402
1-800-684-7783 (Option 2)

5.3 **Community Tissue Services - Toledo, Ohio**
2736 North Holland-Sylvania Road
Toledo, OH 43615
1-800-684-7783 (Option 2)

5.4 **Community Tissue Services - Memphis, Tennessee**
1790 Kirby Parkway
Suite #130
Memphis, TN 38138
1-800-684-7783 (Option 2)

5.5 **Community Tissue Services - Fort Worth, Texas**
328 South Adams Street
Fort Worth, TX 76104
1-800-684-7783 (Option 2)

5.6 **Community Tissue Services - Philadelphia, Pennsylvania**
3573 Bristol Pike, Suite 201
Bensalem, PA 19020
1-800-684-7783 (Option 2)

5.7 **Community Tissue Services – Portland, Oregon**
16361 NE Cameron Boulevard
Portland, OR 97230
**6 AM – 6 PM:** 1-800-545-8668
**Non-Business Hours:** 1-503-808-7000

6.0 Ensure the tissue has been picked up and/or delivered to CTS.
7.0 Miscellaneous

7.1 Cultures:

7.1.1 If cultures are obtained at time of recovery, those cultures are to be sent to the hospital laboratory.

7.1.2 Culture results are to be returned directly to the physician, not CTS.

NOTE: CTS does not perform cultures. CTS will not handle or process cultures.

7.2 Expiration Dates: Frozen autologous donor tissue expires 5 years from the date of recovery and will be discarded.

8.0 At the request of a hospital, pre-assembled autologous kits and applicable documents will be provided to those facilities for which a signed contract is on file.

9.0 In the event you are in need of the applicable documents, they can be printed from the following link: http://www.communitytissue.org/healthcare-professionals/autologous-program/

10.0 Upon request, CTS will provide the requesting facility information regarding the status of the autologous tissue as needed.
